#690160 – Suntan	#690174 – Cinnamon
#690170 – Lt. Brunette	#690175 - Chocolate

13 oz. Bottle

DESCRIPTION

Far superior to previously available liquid powders, Dodge Softouch Liquid Powder is formulated to simulate a natural skin tone – creating a complexion coloring that seems to radiate from within the skin. The transparent quality of the liquid powder suspension prevents any masking effect covering the natural markings and skin pigmentation. It creates a truly lifelike appearance.

FEATURES

Softouch is packaged in a wide neck bottle for easy application. Old-fashioned liquid powders separate out of suspension almost between brush strokes, thus requiring constant recapping and agitation. Softouch stays in suspension longer. Accelerated drying time is another advantage.

APPLICATION

Softouch may be used for treating any complexion which does not require opaque covering. All cosmetic massage cream should be removed from the skin surfaces. This will insure an even distribution of the Liquid Powder Tint. Apply the cosmetic in small sections with a flat tint brush. Blot dry with lint-free gauze or cleansing tissue. Density in color depth may be increased by making a second application. White Kalon Massage Cream or Dodge Dry Wash may be used as a solvent for partial or complete removal of the Liquid Powder Tint from skin surfaces.
